## **Impact of the Ishikawa Earthquake**

JDI would like to express its deepest sympathies to all those affected by the January 1 earthquake in Ishikawa Prefecture, along with JDI's sincere hopes for a speedy recovery.

Immediately after the earthquake, JDI opened its Ishikawa Fab to residents of the local community as an evacuation site.

As of January 3, the impact of the earthquake on JDI is as follows.

### **1. Earthquake Impact**

#### **Personnel**

While JDI has confirmed that there were no casualties among the employees at the Ishikawa Fab, it is currently working on confirming the status of every employee at all other JDI locations in Japan. In addition, JDI has not been able to make contact with a number of family members of JDI employees. JDI will continue to take all necessary measures to confirm everyone's safety.

#### **Production**

JDI's Ishikawa Fab experienced multiple burst pipes, water leaks, and boiler stoppages. The fab was closed for the New Year's holidays through January 8, so JDI organized an emergency recovery task force immediately after the earthquake. Fully resourced engineering and technical teams totaling 71 JDI employees were on site and began recovery work early in the morning of January 2 in order to resume production as soon as possible.

JDI's Tottori Fab experienced no damage.

### **2. Earnings Impact**

Given that the recovery work at the Ishikawa Fab is still underway, the impact of the earthquake on JDI's FY24/3 earnings is currently unknown. Should a material earnings impact emerge, JDI will disclose it promptly.
