Production Resumption at Ishikawa Fab

We would like to express our deepest condolences to the families and friends of those who lost their lives in the Ishikawa earthquake, while extending our heartfelt sympathies to all those affected and our hopes for the earliest possible recovery.

Having systematically reconstituted and verified all critical machinery and production processes, JDI fully resumed production today at its Ishikawa Fab.

1. Production Resumption

JDI relaunched production on multiple lines on January 24, and fully resumed production today.

Given the devastation of the earthquake, this was an enormously difficult process. JDI would like to express our deepest gratitude to all of those who worked tirelessly to bring the Ishikawa Fab back online.

Please note that securing stable energy supplies, necessary for controlling cleanroom temperature and humidity, remains a key challenge that JDI is continuing to address.

2. Earnings Impact

The impact of the earthquake on JDI's FY24/3 earnings is currently under review. If a significant impact on JDI's FY24/3 earnings is identified, JDI will promptly disclose it.
