Operating Profit Breakdown (YoY)

Operating Profit Breakdown (YoY)

(JPY billion)

FY23/3 Q1

Sales: 57.1

FY24/3 Q1

Sales: 53.0

- YoY expansion of operating loss mainly due to non-cash inventory accounting effects
- Operating profit improved YoY excluding above accounting effects
- Negative impact of rising material & energy costs offset by fixed cost reductions, including production end at Higashiura Fab & line downsizing at Mobarra Fab linked to strategic withdrawal from Mobile

Operating Profit Breakdown (QoQ)

Operating Profit Breakdown (QoQ)

(JPY billion)

FY23/3 Q4

Sales: 62.7

FY24/3 Q1

Sales: 53.0

- Operating profit significantly improved QoQ
- Business mix improvement from exiting unprofitable non-core businesses & production end at Higashiura Fab drove QoQ improvements

Japan Display Inc.

JDI recognizes the importance of identifying climate change risks and opportunities, generating robust responses, and disclosing those responses in order to support its sustainable growth. JDI has therefore decided to support TCFD.

By incorporating climate change responses into its strategy and operations, JDI is accelerating its efforts to contribute to a low-carbon, sustainable society.

TCFD was established by the Financial Stability Board (FSB) at the request of the Finance Ministers and Central Bank Governors of G20 to study climate-related disclosures and the response of financial institutions to climate change. Recommendations announced by TCFD in 2017 are global initiatives that encourage companies to disclose risks and opportunities related to climate change with respect to their business activities.

JDI is working to become a more environmentally friendly and sustainable company. JDI always considers its fabs' impact on the environment and is reducing resource usage and emissions

JDI's ongoing commitment to ESG concerns has been recognized with JDI being included in the FTSE Blossom Japan Sector Relative Index in 2022 and FTSE Blossom Japan Index in 2023
